FOREWORD

The Government of Rwanda, through the National Institute of Statistics of Rwanda (NISR) conducted the 2022 Rwanda Population and Housing Census to provide updated demographic, social and economic indicators for policy formulation and planning to support the national development agenda and track the implementation of national, regional, continental and global development goals, such as the First National Strategy for Transformation (NST1 2017-2024); the AU Agenda 2063; and the Sustainable Development Goals (SDGs).

The Population and Housing Census in Rwanda dates back to the year 1978 when the first ever modern census was implemented. The second, third, and fourth censuses were carried out in 1991, 2002, and 2012 respectively. The 2022 Population and Housing Census marks therefore the Fifth in the series following the United Nations Recommendations to conduct a census every ten years.

Considering census' crucial importance for the planning process, the Government of Rwanda has made the Population and Housing Census a priority to be undertaken every 10 years and adopted the use of technologies for timely delivery of census results for use.

Results of the 2022 Population and Housing Census provide population numbers from national to the lowest administrative level, as well as demographic and socio-economic indicators at both national and district levels. The census remains the only national data collection exercise that can provide the lowest levels of disaggregation to support decentralised decision making across the country.

I would like therefore to take this opportunity to thank all stakeholders that contributed to the success of the 2022 Population and Housing Census. They include Ministries and other Government institutions, international organizations such as the World Bank (WB), the European Union (EU), the United Nations Population Fund (UNFPA), One-UN, UN Women, UNICEF, UNECA, the United Kingdom AID (UKAID), the African Development Bank (AfDB), the USAID, Enabel, PARIS 21 and others for their support in diverse ways.

My special thanks go to the local government leaders from the province to the village levels who contributed a lot to the success of the 2022 Population and Housing Census. Exceptional gratitude to all enumerators, teachers and young people who collected the information and all respondents for their cooperation and dedication. The National Institute of Statistics of Rwanda (NISR) deserves special appreciation for the excellent operational and coordination of all census activities.

I finally recommend that the invaluable information contained in different thematic reports of the 5th Rwanda Population and Housing Census be used as updated evidence for all decision and policy making for the national, regional and global development programs.

Dr. Uzziel NDAGIJIBAYA
Minister of Finance and Economic Planning

ACKNOWLEDGEMENTS

The National Institute of Statistics of Rwanda (NISR) is pleased to release the results of the Fifth Population and Housing Census (RPHC5). The execution of different Census phases: preparatory works, data collection, data processing, tabulation and data analysis spans a period of about four years between 2020 and 2023.

NISR is pleased to publish the main indicators report as the main flagship report of the RPHC5. This report will be followed by several thematic reports and districts profile reports. The main indicators report covers several issues mainly population size and distribution, education, settlement, population projections to mention but a few. NISR hopes that the results in this report supplemented by the upcoming thematic reports would meet the demand of census data users across the board.

On this occasion, I would like to extend my sincere gratitude to the Government of Rwanda and development partners for availing financial, logistical and technical support. The NISR would like to appreciate all stakeholders who worked tirelessly with us to ensure that the 2022 Rwanda Population and Housing Census operation was successful.

Special recognition also goes to the Ministry of Finance and Economic Planning, Ministry of Defense, Ministry of Local Government, Ministry of Education, Ministry of Foreign Affairs, Ministry of ICT and Innovation, Ministry of Interior, Ministry of Health, Ministry in Charge of Emergency Management, the Rwanda National Police, Rwanda Correctional Services, Rwanda Biomedical Center (RBC), Rwanda Information Society Authority (RISA), Rwanda Utilities Regulatory Authority (RURA), Rwanda Public Procurement Authority (RPPA), Office of Government Spokesperson (OGS), and Rwanda Broadcasting Agency (RBA) for the direct involvement in awareness campaign, logistical and data collection operations.

I also wish to express my appreciation to the local government authorities and NISR staff for their excellent operational organization and to the tens of thousands of enumerators and supervisors for their painstaking efforts throughout the data collection phase.

Finally, the people of Rwanda, residents, and visitors, your cooperation was crucial towards the success of the census.

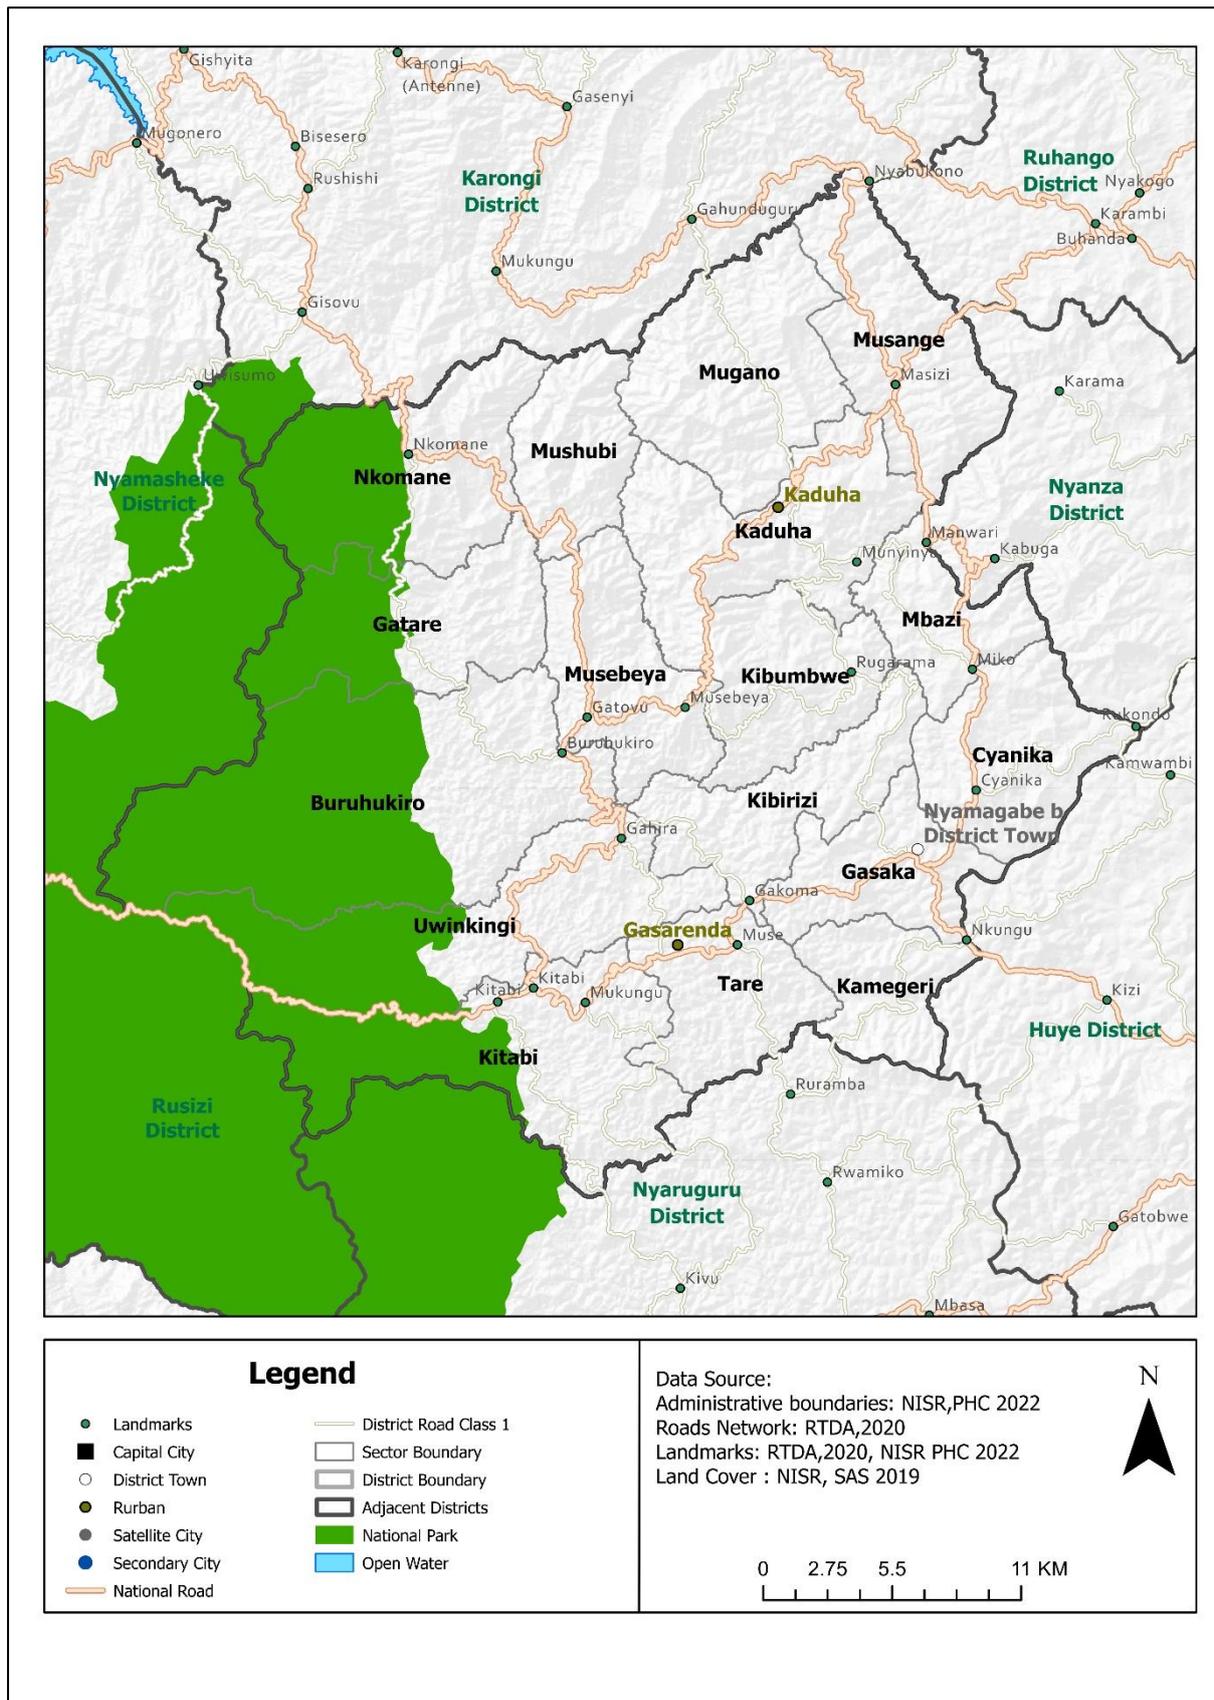

Thank you.

MURANGWA Yusuf
Director General,
National Institute of Statistics of Rwanda

CHAPTER 1: POPULATION SIZE, SPATIAL DISTRIBUTION, AND STRUCTURE

1.1 Size and Spatial Distribution of the population

1.1.1 Size and Spatial Distribution of the Population of Southern Province

The 5th Rwanda Population and Housing Census (PHC5) has enumerated 3,002,699 residents in the Southern Province, which represents 22.67% of the total population of Rwanda (13,246,394 residents). The population of the Southern Province is predominantly female; 1,554,244 are women corresponding to 51.76% of the total population of the province. Kamonyi is the most populated district with 450,849 residents in 2022. Its population represents 15.01% of the total residents' population of Southern Province. The least populated district in the Southern Province is Nyaruguru with 318,126 inhabitants, corresponding to 10.59% of the total resident population of Southern Province.

Table 1. 1 Resident population distribution of the Southern Province by sex and District

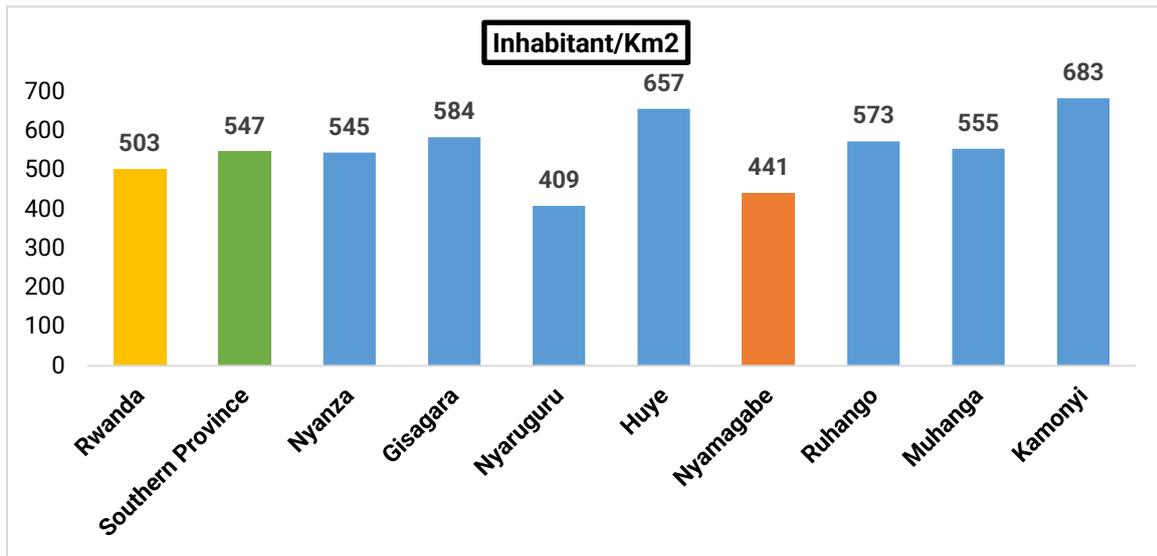

District	Counts			Population share (% of the total population)		
	Both sexes	Male	Female	Male	Female	Both sexes
Rwanda	13,246,394	6,429,326	6,817,068	48.54	51.46	
Southern Province	3,002,699	1,448,455	1,554,244	48.24	51.76	100.00
Nyanza	365,718	178,645	187,073	5.95	6.23	12.18
Gisagara	397,051	188,965	208,086	6.29	6.93	13.22
Nyaruguru	318,126	151,980	166,146	5.06	5.53	10.59

1.1.2 Population Density of the Southern Province by District

Population density is a measurement of population per unit land area. Density is the number of the inhabitant per Km². The Rwanda Population and Housing Census conducted in 2022 revealed that, the population density in Rwanda is 503 inhabitants per Km². The Southern Province has 547 inhabitant per Km². The district with a high population density is Kamonyi with 683 Inhabitants per km². The district with a lowest population density is Nyaruguru with 409 Inhabitants per km². The figure below indicates distribution of population density per district.

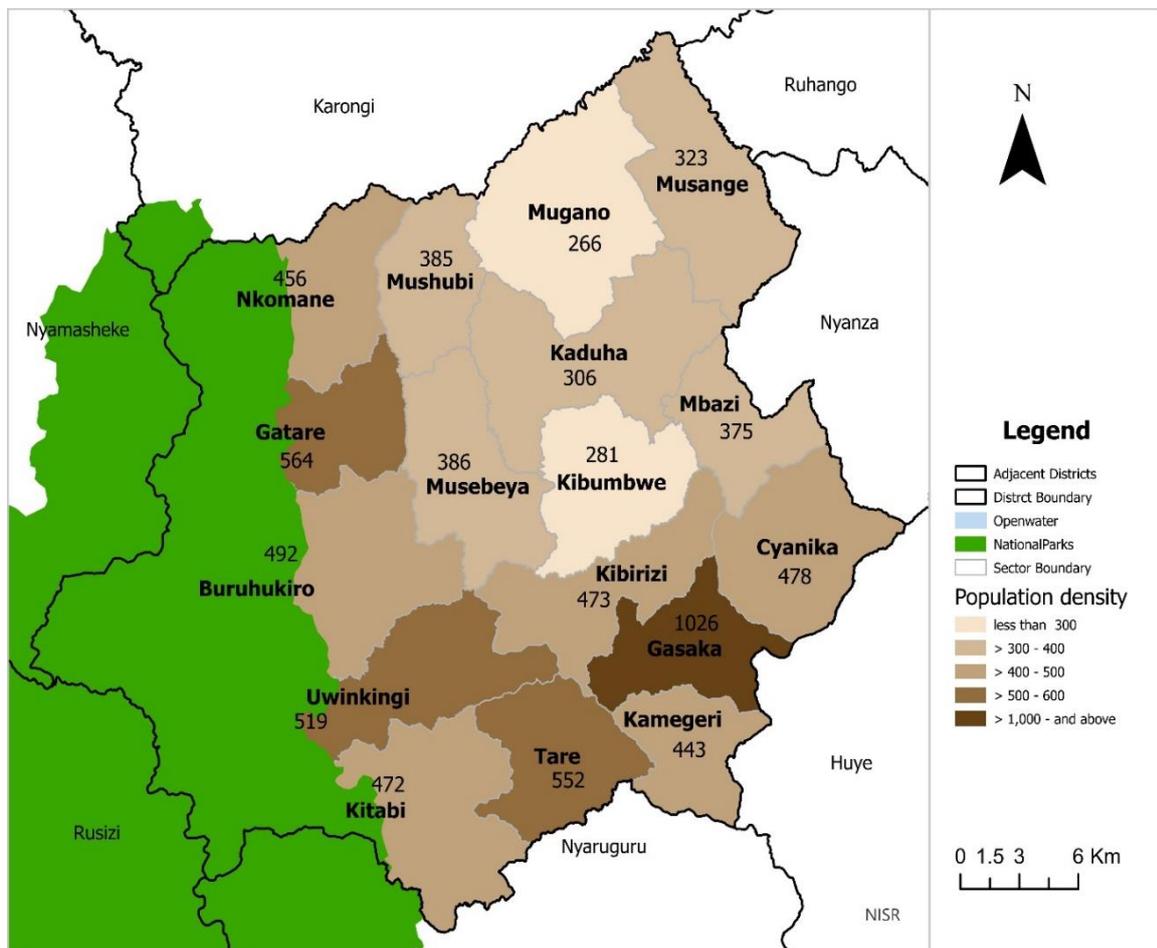

Figure1. 2 Population density (inhabitant per Km²) by district in Southern Province

Source: Fifth Rwanda population and housing census, 2022(NISR)

The population density of Nyamagabe district by sector are displayed in the map below:

Figure1. 3 Distribution of population density by sectors of Nyamagabe District

1.1.3 Size and Spatial Distribution of the Population of the Nyamagabe district

The results in previous Table 1. 1 indicates that 371,501 residents were enumerated in Nyamagabe district, which represent 12.37% % of the total population of the Southern Province(3,002,699 residents). The population of Nyamagabe district is predominantly female: 194,776 are women corresponding to 52.4 % of its total population. The table below 1.2 indicates the number of the population of Nyamagabe district by sector, by sex, their percentages and their shares across sectors to the total population of Nyamagabe district. Males are predominant only in one out of 17 sectors of the district (Gatare with 51.1%). Gasaka (41,558 population) and Kitabi (28,172 population) are the most populated sectors. They represent 11.2% and 7.6% of the total population of Nyamagabe district, respectively. The two less populated sectors are Mbazi (12,511 inhabitants) and Kibumbwe (13,767 inhabitants). They represent 3.4% and 3.7% of the total resident population of Nyamagabe district, respectively.

Table 1. 2 Distribution of Resident Population of Nyamagabe District by sector and Sex in 2022

Sectors	Frequency			Percent			Population Share
	Both sexes	Male	Female	Both sexes	Male	Female	Both sexes

1.1.4 Size and Spatial Distribution of the Population of Nyamagabe district by residence area

The results of Rwanda Population and housing census 2022 revealed that, the total population of Rwanda are spatially distributed in rural area that represent 72.1% and urban area represent 27.9%. The Southern Province is predominantly by the rural area (85.2%) and urban area (14.8%). Nyamagabe district population is predominantly by rural area 89.1% while urban represents 10.9%. The 11 out of 17 sectors of Nyamagabe district are entirely considered as rural area. The table below 1.3 illustrates the results.

Table 1. 3 Distribution(Count and %) of Resident Population of Nyamagabe District by sector and Area of Residence in 2022

Sectors	Counts			Percentage		
	Area of residence			Area of residence		
	Total	Urban	Rural	Total	Urban	Rural

1.1.5 Age-Sex Structure of the Population of Nyamagabe district

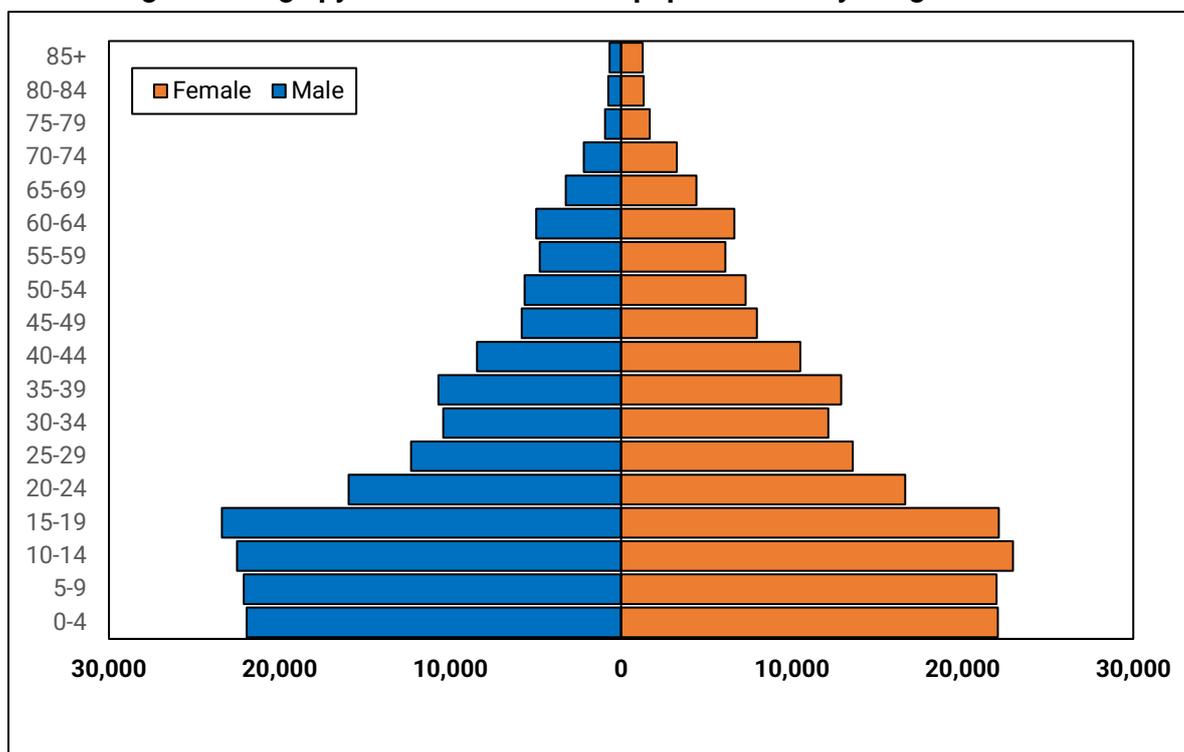

Nyamagabe population is mostly young. 56.97% of the resident population of Nyamagabe is under 25 years, as shown by the age pyramid (Figure 1. 4), reflecting the high level of fertility in the recent past. The elderly (60 years and above) represents 9.53 % of the total population of the district. The table below 1.4 illustrates the results, and more details of sectors are in the annex.

Table 1. 4 Distribution(Count and %) of Resident Population of Nyamagabe District by 5-Year Age Group and Sex in 2022

Age group	Counts			Percent		
	Both Sexes	Male	Female	Both Sexes	Male	Female
Nyamagabe district	371,501	176,725	194,776	100	100	100

1.1.6 Population share of some specific interventions target groups in Nyamagabe District by sex

The Rwanda population and housing census 2022 indicate the population on specific ages-based programs, policy and strategies interventions in health, education, employment and also indicates the population categories in their respective characteristics such as children, youth, working population, among other things. For instance, children under five years for immunization programs(Under 5 years children), children in school age (3-17 years), people in the official working age group (16 years and above), etc.

Knowing the size of such groups is of great importance for the design, implementation, monitoring, and evaluation of programs targeting such groups. The below table gives the size of the main interventions target groups by sex, and their share in the entire population of Nyamagabe district. The population aged 0-17 represents 43.7 % of the total population of the district, 16-30 years represent 26.8%; the working age population aged 16 and above represents 61.5% of the same population. The table below shows distribution of Nyamagabe districts by targeted interventions by their age.

Table 1. 5 Number and population share (%) of some specific interventions target groups in Nyamagabe District by sex

CHAPTER 2: CHARACTERISTICS OF THE POPULATION

2.1 Socio-cultural characteristics of the population

2.1.1 Nationality of the population of Nyamagabe district

The results of 5th RPHC-2022 indicate that, the Rwandan population by nationality represent 99.1% and foreigners represent 0.89%. In the Southern Province, foreigners represent 0.61% and Nyamagabe districts, the Rwandan by nationality represent 98.2% and foreigners represent 1.82% (6,743). In Nyamagabe district the highest percentage of foreigners are found at Gasaka sector (6678). The table below illustrates the distribution of the population by nationality with their respective sectors of residence.

Table2. 1 Distribution (count and %) of the resident population of Nyamagabe district by Nationality and sector

2.3 Educational Characteristics of the Population of Nyamagabe district

2.3.1 School attendance

Table 2.5 below shows that, in Nyamagabe district, 45.8% of pre-primary-age population (3-5 years) are currently attending school, 54.2% of children have never attended and 0% of children have previously attended (i.e children who have already had prior exposure to nursery school education before the time of census but who were not attending nursery school/droped-out during census time). Gasaka Sector has the highest proportion of children (age between 3 to 5) currently attending school in Nyamagabe District (73.4%). Following closely, the Kamegeri Sector has a percentage of 67.8% of children currently attending school. Nkomane sector has the lowest percentage of children currently attending school, with only 23.2% enrolled. On the other hand, Nkomane and Kaduha sectors have the highest proportion of children aged 3 to 5 who have never attended school (76.8 and 71.2%, respectively).

Source: Fifth Rwanda population and housing census, 2022(NISR)

Table 2.6 shows that in Nyamagabe District 88.7% of children age 6 to 11 years (the official primary school-going age) are currently attending school, 9.9% have never attended school and only 1.4% have previously attended school (which means that 11.3 of children aged 6 to 11 are out of school).

By comparing the distribution of the primary school-age population (6-11 years) across sectors in Nyamagabe District, comparisons reveal the disparities in primary school attendance across different sectors within Nyamagabe District. Sectors like Nkomane, Mugano and Gatare exhibit lower rates of children currently attending school (77.1, 83.1 and 83.2%, respectively) and sectors with the higher rates of children who have never attended are Nkomane and Gatare (19.5, and 15.5%, respectively). On the other hand, sectors like Gasaka and Kamegeri demonstrate higher rates of children currently attending school (96.8 and 95.0%, respectively).

² The Distribution (count and %) of the pre - primary-age (3-5 years) population of Nyamagabe district by Sector by Male and by Female is in the Annex

In Nyamagabe District 20.9 % of the population aged 12 to 17 have previously attended school (i.e. they dropped out of school), 76.4% are currently attending school and 2.7% have never attended secondary school.

The distribution of the secondary school-age population (12-17 years) across sectors in Nyamagabe District, shows that Mbazi sector has the highest percentage of the population aged 12 to 17 currently attending school at 85.6%. Conversely, Gatare sector has the lowest percentage of the population aged 12 to 17 currently attending school with 58.6%. Gatare Sector also has the highest percentage of the population between the ages of 12 and 17 who have never attended school at 8%.

³ The Distribution (count and %) of the primary -age (6-11 years) population of Nyamagabe district by Sector by male and by female is in the annex

2.3.2. Gross and Net Attendance Rate (%) in Primary School in Nyamagabe District

Gross and Net Attendance Ratios are used to measure the extent of coverage of an educational program. It gives a comparison of the children attending school with the total size of the school-age population. It can also be used for assessing how far a country has succeeded in bringing to school all those who are eligible to attend.

The results of 5th RPHC 2022 reveal that not all children attending primary school level are of the official age for that level (6-11 years). The gross attendance rate in Rwanda is 141.7, in the South Province GAR is 146.6 and 156.8 in Nyamagabe district. The Net Attendance Rate (NAR) in Primary school for Nyamagabe district (88.7%) is below the NAR of the south province and national level (90.0% and 89.3% respectively).

A Gross Attendance Rate (GAR) of 156.8% in Nyamagabe District for the population 6 to 11 years indicates a high percentage of those who attended primary schools aged below 6 years and or above 11 years. On the other hand, the NAR of 88.7% for the population 6 to 11 years indicates that only 88.7% of the population 6 to 11 years were attending primary schools in Nyamagabe District. In 2022, students older or younger than the official primary school age range made up 43.4% $[(GAR156.8 - NAR88.7)/GAR156.8]$ of the primary school population of Nyamagabe District.

With a NAR of 96.8%, the Gasaka Sector has the greatest percentage of pupils that are attending primary school and are of primary school-age. In comparison to other sectors, the Nkomane sector has the lowest NAR at 77.1%, indicating a lesser percentage of pupils who are attending primary school within the eligible age range. All most all sectors have gender parity indexes greater than 1.00 except Kibirizi sector (1.00), suggesting better access to education for female students compared to male students.

Table2. 8 Gross and Net Attendance Rates (%) in Primary School level (Children aged 6-11 years) of Nyamagabe District by Sex and Sector⁴

2.3.3 Gross and Net Attendance Rate (%) in Secondary School

The table 2. 9 provides information on the gross and net attendance rates in the secondary school level (12-17 years) in Nyamagabe District, disaggregated by sex and sector. The South Province and Nyamagabe District both have lower NARs than the national average (21.9% and 18.9%, respectively, versus 22.3%) when compared to the national average. Comparing males and females in Nyamagabe District in terms of Net Attendance Rates (NAR), the table 2.9 indicates that a higher proportion of females (22.7%) in Nyamagabe District, within the secondary school-age range (12-17 years), are attending school compared to males (15.1%).

⁴ **Enrollment** is the act of enrolling or the state of being enrolled while **Attendance** is (the state of attending) the state of attending; presence.

Female students older or younger than the official secondary school age range made up 45.0 % $[(GAR41.3-NAR22.7)/GAR41.3]$ of the female with secondary school age of Nyamagabe District, while for male students it made up 52.1% $[(GAR31.5-NAR15.1)/GAR31.5]$. This shows that females have a higher attendance rate in Nyamagabe District compared to males when considering the overall attendance rates, regardless of age or grade-level eligibility.

Among the sectors in Nyamagabe District, Gasaka sector have a highest GAR for both sexes, with a rate of 62.4%. Sectors such as Mugano, Gatare, and Buruhukiro have relatively lower GAR compared to others (19.1%, 24.1% and 25.2% respectively). Gasaka has the highest NAR for both sexes in Nyamagabe District, with a rate of 32.2%. Sectors like Mugano, Kibumbwe, Nkomane, Gatare, and Buruhukiro have relatively lower (less than 15%) NAR compared to others (9.6%, 12.5%, 12.6%, 12.9, and 13.7% respectively).

2.3.4 Highest level of school attended in Nyamagabe district

The results of 5RPHC-2022 indicate the total population of Rwanda aged 3 and above is 11,999,691. The highest level of education attended is categorized into several levels: Never attended School, Nursery, Primary, INGOBOKA/Vocational, Lower secondary, Upper secondary, University, and Not stated. In Rwanda, 16.7% of the population aged 3 years and above has never attended school, while 2.7% have attended nursery, and 59.5% have attended primary school. Other education levels include 0.8% for INGOBOKA/Vocational, 9.6% for lower secondary, 7.1% for upper secondary, 3.6% for university, and 0.0% is not stated.

The total population of the South Province aged 3 and above is 2,720,038. The distribution of the highest level of education attended is like the national level, with slight variations. In the South province, 17.1% of the population has never attended school, while 2.3% have attended nursery, and 62.6% have attended primary school. Other education levels include 1.2% for INGOBOKA/Vocational, 9.0% for lower secondary, 5.5% for upper secondary, 2.4% for university, and 0.0% is not stated.

The total population of Nyamagabe District aged 3 and above is 339,814. In Nyamagabe District, 19.9% of the population has never attended school, while 1.9% have attended nursery, and 61.4% have attended primary school. Other education levels include 1.0% for INGOBOKA/Vocational, 8.6% for lower secondary, 5.3% for upper secondary, 1.8% for university. The distribution of the highest level of education attended varies among sectors, with differences in the percentage of individuals at each education level. For example, Nkomane has a higher percentage (28.4%) of individuals who have never attended school compared to other sectors, while Gasaka has a higher percentage (10.6%) of individuals attended upper secondary school. Each sector has its own unique distribution of education levels attended by the population. The table below indicates the findings:

Table2. 10 Distribution (Count and %) of the resident population of Nyamagabe district aged 3 and above by highest level of school attended by sector(Both sexes)⁵

⁵ The Distribution (Count and %) of the resident population of Nyamagabe district age 3 and above by highest level of school attended by sector (male, female) is in the annex .

2.4 Characteristics of the Employed Population

The official working age in Rwanda is 16 years and above. Aggregate employment generally increases with growing population. Therefore, the ratio of Employment to the working age population (employment to population ratio) is an important indicator of the capacity of the Economy to provide employment to a growing population. A decline in the employment-to population ratio is often regarded as an indicator of economic slowdown and a decline in total employment as an indicator of a more severe economic downturn.

2.4.1 Employment to population ratio by sex, Province, District and area of residence

The results presented in the below table 2.11 shows that the employment to population ratio stood at 45.9 in Rwanda, it is lower among females (40.2 percent) than males (52.4 percent). On the other side, it was observed that the employment to population ratio is higher in urban areas of Rwanda (53.5 percent) than in rural areas (42.7 percent).

It was observed that in Southern Province, the employment to population ratio stood at 42.9 percent, it is higher in urban areas (52.5 percent) than in rural areas of Southern Province (41.2 percent).

It was also revealed that the employment to population ratio is 45.7 percent among people residing in Nyamagabe district, it is higher in rural areas of Nyamagabe (46.3 percent) than in urban areas of Nyamagabe (40.3 percent).

Table2. 11 Employment to population ratio by sex, Province, District and area of residence.

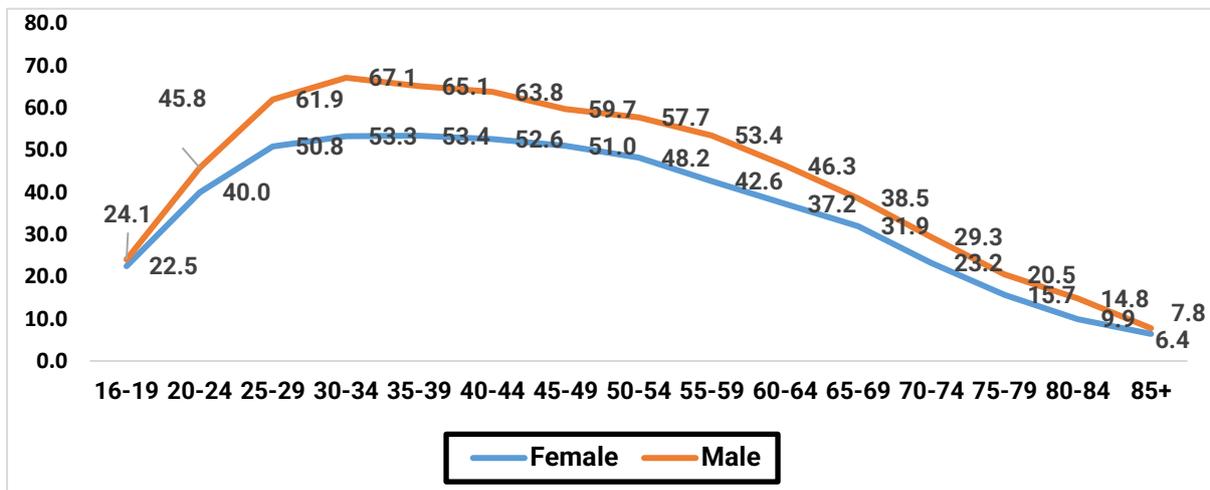

Province and Districts	Total			Urban			Rural		
	Both Sexes	Male	Female	Both Sexes	Male	Female	Both Sexes	Male	Female

2.4.2 Employment to population ratio(EPR) among the resident population of Nyamagabe aged 16 years and above by age group and sex

Figure 2.1 allows the study of intensity of Employment to population ratio and its variation by sex. The figure reveals the following remarks: The employment to population ratio among males as well as females increases from age group 16-19 to 35-44 and starts decreasing from age group 45-49 to 85 years and above as people starts getting very older and retire. It was observed that in district of Nyamagabe, the highest employment to population ratio among males stands at 67.1% and was observed in age group 30-34, On the other side the highest employment to population among females is 53.4% and was observed in the age group 35-39. The lowest employment to population ratio among males stands at 7.8% and was observed among males in the age group 85+, the lowest employment to population ratio among females is 6.4% and was observed among females in the age group 85+.

CHAPTER 3: SUB-POPULATION

3.1 Children Population (0-17 years)

According to the UN Convention on the Rights of the Child (1989), a child is defined as every human being under 18 unless, under the law applicable to the child, majority is attained earlier. It is relevant to underline here that this definition by age coincides with that of Rwanda, as stipulated in Article 3 of the National Law n° 54/2011 of 14 December 2011 relating to the rights and the protection of the child, which stipulates that a child is any person under the age of 18. The age range (0–17) adopted for this report reflects this definition.

3.1.1 Number and share of children in Nyamagabe district

The results of 5Th RPHC-2022 revealed that, the children population constitute 44.5% of the total population of 13,246,394. The Southern Province has 1,333,748 children with a share of 44.4% of the total resident population. In Nyamagabe District, the children constitute 43.7% of the resident population of the district, with a percentage of males slightly greater than the females' one (46% vs 41.6%). The children's share is high in Kibumbwe (46.6%) and Kaduha (45.4%), and small in Gasaka (42.3%) and Mbazi (42.4%). The table below indicate distribution of children by sector and by sex.

Table3. 1 Number and share (%) of children aged 0-17 years among the total resident population of Nyamagabe district by sex and sector of residence.

3.2 Youth population in Rwanda

For statistical purposes, the United Nations defines “youth” as those persons between the ages of 15 and 24 years, without prejudice to other definitions by Member States. Considering the current priorities and trends of Rwanda’s Development, the definition of Youth in terms of age has been revised in this policy. It was brought from 14–35 years to 16–30 years.

3.2.1 The youth population in Nyamagabe district

The results of 5th Population and housing Censuses conducted in 2022 revealed that, the youth represent 27.1% (3,595,670) of the total population (13,246,394). The youth population in Nyamagabe district was 99,691 which represents 26.8% of the total resident population of the district (371,501). The sector with the highest youth share is Gatare (31.4%) while Gasaka (28.5%) and Kitabi (28.1%) have the lowest share of youth. The table below indicate distribution of youth by sector, and by sex.

Table 3. 4 Number and share (%) of the resident youth aged 16-30 years among the total resident population of Nyamagabe district by Sector of residence and sex (Both sexes)

3.4 Elderly Population(60 years and above)

Rwanda has enacted laws such as the Law No 088/01 of 07/09/2020 (Office of the Official Gazette of Rwanda, 2020) on Presidential order ratifying the protocol to the African charter on human and peoples' rights on the rights of older persons in Africa adopted by the twenty sixth ordinary session of the Assembly, held in Addis Ababa, Ethiopia, on 31 January 2016 through an Official Gazette No.27 of 07/09/2020 and Law No.59/2008 of 10/09/2008 on prevention and punishment of gender- based violence (Office of the Official Gazette of Rwanda, 2008), whose Article 32 sets the penalty for violence against an elderly person.

It is over two decades since the United Nations convened the First World Assembly on Ageing (Vienna, 1982) (National Academy of Sciences, National Research Council, 2001)) that launched an international action programme, which was the first international instrument on ageing, to provide a foundation for the formulation of policies and programmes on ageing. This was done to guarantee economic and social security to older persons and other opportunities to contribute to national development.

3.4.1 Elderly population of Nyamagabe district by Sector

In 2022, the elderly persons constitute 8.4% of the total resident population of Nyamagabe district. The share of the elderly females is higher than the male's one (9.5% vs. 7.2%), reflecting the higher life expectancy for women. . By sector, Mbazi (9.5%) and Cyanika (9.4%) have the highest share of elderly among their total population while Buruhukiro and Gatare have the lowest (7.5% each).

Table3. 12 Number and share (%) of the resident elderly (aged 60 years and above) among the total resident population of Nyamagabe district by Sector of residence and sex

CHAPTER 4: HOUSEHOLDS AND HOUSING CHARACTERISTICS

4.1 Household characteristics

In this chapter 5th Population and housing census 2022 investigated households and housing characteristics; those include household size, head of household by sex, type of habitat, housing tenure, materials used for construction, sources of energy used for lighting and cooking, water sources, sanitation facilities, asset possessed by household and mode of waste and disposals.

4.1.1 Number and mean size of the private households

The results of 5th RPHC 2022 indicate the total of 3,312,743 households in Rwanda, 760,173 in the Southern Province and 92,052 in Nyamagabe district. The average household size in Nyamagabe District is 4 persons per household. At the Sector level, the highest sizes are found in Gasaka and Kitabi (4.3 persons/household) and Kibirizi (4.2 persons/household). The smallest household sizes are found in Cyanika (3.7 persons/household). The table below indicates number of households and size of household members per sector.

Table4. 1 Distribution of the private households and their corresponding population and mean size

4.2 Housing Characteristics

4.2.1 Type of habitat

The results of 5th Population and Housing Census 2022 revealed that in the Southern Province the predominant type of habitat is Umudugudu (Planned rural settlement) (72.3%). It is the same as in Nyamagabe district as one of the districts of the Southern Province. The most common type of habitat in Nyamagabe district is Umudugudu (Planned rural settlement) (69.2%) followed by dispersed or isolated housing (26.2%). The type of habitat varies across sectors. Umudugudu (Planned rural settlement) is most prevalent in Mbazi (94.7%) and

Kamegeri (91.6%) and low in Uwinkingi (35.8%) and Mugano and Nkomane (55.6%). The sectors with the high percentages of dispersed/isolated housing units are Uwinkingi (63.6%) and Mugano (41.1%). The table below displays results by sector.

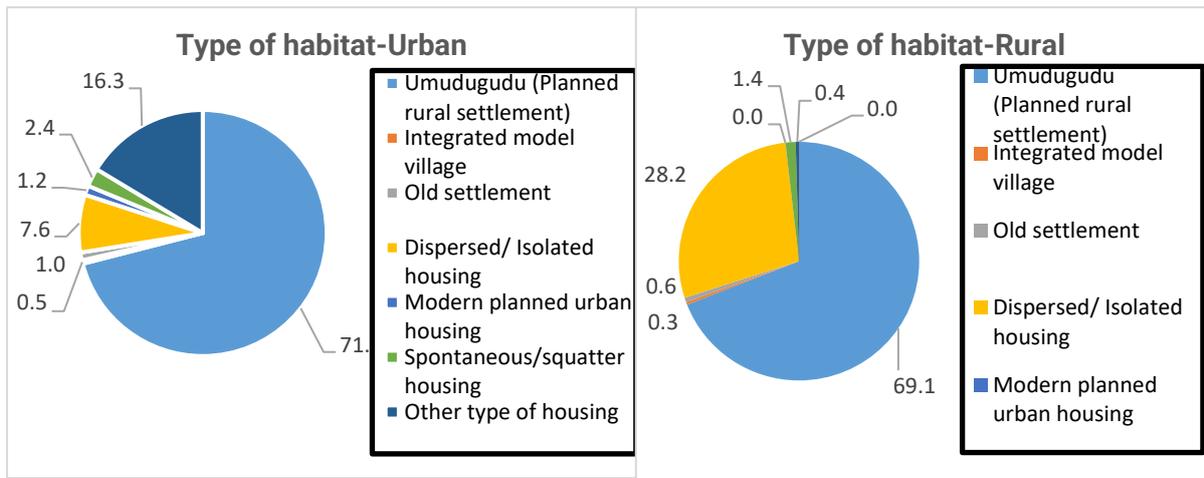

Table4. 3 Distribution (count and %) of the private households of Nyamagabe district by type of habitat and Sector

4.2.3 Material of the housing units

4.2.3.1 Main materials of the roof

The results of 5th RPHC 2022 indicate that housing units are mainly covered by iron sheets in Rwanda (74.1%), in the Southern Province, the Iron sheet represent (39%). In Nyamagabe district, housing units are mainly covered by Local tiles (74.4%). Only 0.1% are covered by industrial tiles, 25.4% by Iron Sheets. The variation by sector is not very significant. The high percentages of housing units covered by iron sheets are found in Gasaka (80.4%) and Kamegeri (45.5%). The lowest is Nkomane with 4.6% of housing units covered by iron sheets. The highest percentage of the housing units covered by local tiles is found in Nkomane sector (95.2%). The table below displays details:

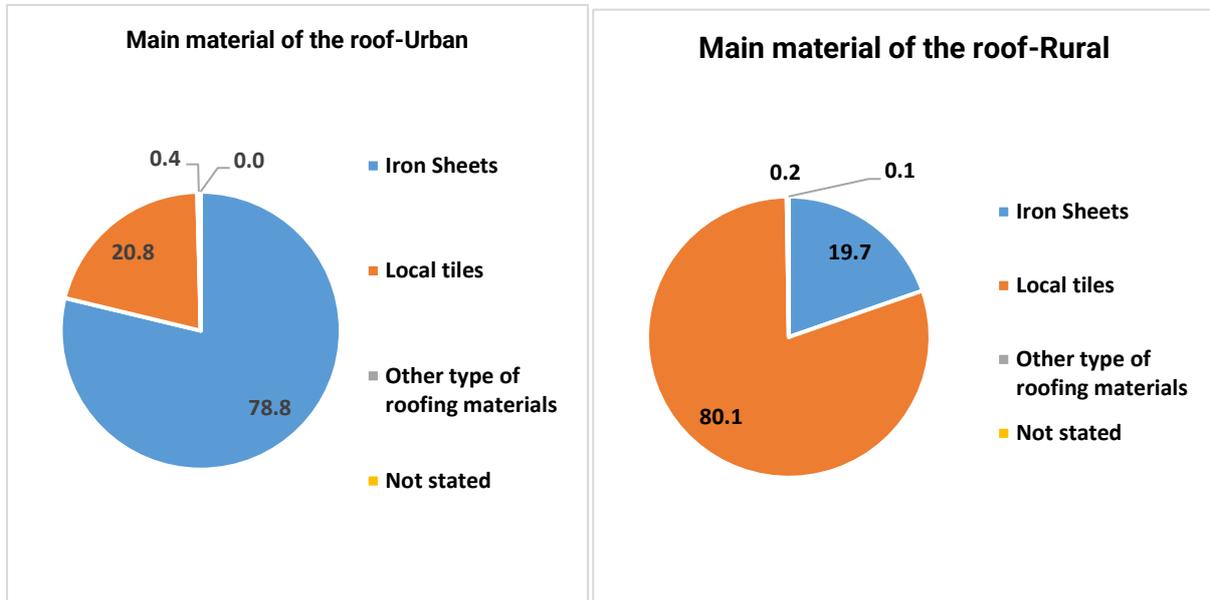

Table4. 5 Distribution (count and %) of the private households of Nyamagabe district by main material of the roof of the housing units and by Sector

4.2.3.3 Main materials of the floor

The results 5RPHC 2022 indicate that the main material of the floor of the housing units is earth (60.4%) in countrywide. In the Southern Province, the earth is the main material of the floor of the housing units (64.2%). In Nyamagabe district, the main material of the floor of the housing units is earth (78.1%) followed by cement (17.3%). At sector level, the earth as main material used for the floor is most found in Nkomane (90.1%), Mugano (88.7%), and Gatare (86.8%). The highest percentage of the housing units with cement as main material used for the floor is found in Gasaka (38.9%). The table below displays details:

4.3. Source of energy of the private households

4.3.1 Grid line connectivity in Nyamagabe district

At national level, the results of the 5th RPHC 2022 revealed that 52.5% of private households are connected to the national grid while 47.5% are not connected. In Southern province, the percentage of private household connected to the national grid line is 43.8% while it is 31.6% in Nyamagabe district. At the sector level, over 50% of private households are not connected to the national grid line in only 2 sectors out of 17. Mbazi (59.1%) and Gasaka (58.8%) have the higher percentages. Sectors with lower percentages of private households connected to the national grid line are Gatare (14.2%) and Nkomane (14.9%). The table below displays details:

Table4. 8 Distribution (Count and %) of private households by connection to the Grid line in Nyamagabe District by Sector and area of residence

CHAPTER 5: AGRICULTURE IN NYAMAGABE DISTRICT

The agriculture was the one of the areas of investigation of the 5th Rwanda Population and housing census conducted in 2022. The households engaged in Livestock husbandry; the number of private crop farming households cultivating different types of crops, by Sector, the number of private households raising different types of livestock, by Sector and type of household raised in district were captured in the census.

5.1 The households engaged in crop farming and livestock husbandly

The results of 5th RPHC 2022 revealed that 2,280,854 private households (68.9%) are engaged in agriculture country wide. Among them, 62.6% are engaged in crop farming and 50.4% are engaged in Livestock husbandry. In Nyamagabe district, agricultural households represent 86.9% with 81.9% of households engaged in crop farming and 72.2% in Livestock husbandry.

At the sector level, the highest percentages of agricultural households are found in Mbazi (94.5%) and Musebeya (93.8%). Households engaged in crop farming are more represented in Mbazi (92.8%) and Musange (90.5%) while those engaged in livestock husbandry are in Musebeya (82.6%) and Uwiankingi (82.0%). The table below provides details:

Table5. 1 Distribution of household engaged in livestock husbandly in Nyamagabe district.
