## FOREWORD

---

The Government of Rwanda, through the National Institute of Statistics of Rwanda (NISR) conducted the 2022 Rwanda Population and Housing Census to provide updated demographic, social and economic indicators for policy formulation and planning to support the national development agenda and track the implementation of national, regional, continental and global development goals, such as the First National Strategy for Transformation (NST1 2017-2024); the AU Agenda 2063; and the Sustainable Development Goals (SDGs).

The Population and Housing Census in Rwanda dates back to the year 1978 when the first ever modern census was implemented. The second, third, and fourth censuses were carried out in 1991, 2002, and 2012 respectively. The 2022 Population and Housing Census marks therefore the Fifth in the series following the United Nations Recommendations to conduct a census every ten years.

Considering census' crucial importance for the planning process, the Government of Rwanda has made the Population and Housing Census a priority to be undertaken every 10 years and adopted the use of technologies for timely delivery of census results for use.

Results of the 2022 Population and Housing Census provide population numbers from national to the lowest administrative level, as well as demographic and socio-economic indicators at both national and district levels. The census remains the only national data collection exercise that can provide the lowest levels of disaggregation to support decentralised decision making across the country.

I would like therefore to take this opportunity to thank all stakeholders that contributed to the success of the 2022 Population and Housing Census. They include Ministries and other Government institutions, international organizations such as the World Bank (WB), the European Union (EU), the United Nations Population Fund (UNFPA), One-UN, UN Women, UNICEF, UNECA, the United Kingdom AID (UKAID), the African Development Bank (AfDB), the USAID, Enabel, PARIS 21 and others for their support in diverse ways.

My special thanks go to the local government leaders from the province to the village levels who contributed a lot to the success of the 2022 Population and Housing Census. Exceptional gratitude to all enumerators, teachers and young people who collected the information and all respondents for their cooperation and dedication. The National Institute of Statistics of Rwanda (NISR) deserves special appreciation for the excellent operational and coordination of all census activities.

I finally recommend that the invaluable information contained in different thematic reports of the 5<sup>th</sup> Rwanda Population and Housing Census be used as updated evidence for all decision and policy making for the national, regional and global development programs.

  
Dr. Uzziel NDAGIJIBAYA  
Minister of Finance and Economic Planning

## ACKNOWLEDGEMENTS

---

The National Institute of Statistics of Rwanda (NISR) is pleased to release the results of the Fifth Population and Housing Census (RPHC5). The execution of different Census phases: preparatory works, data collection, data processing, tabulation and data analysis spans a period of about four years between 2020 and 2023.

NISR is pleased to publish the main indicators report as the main flagship report of the RPHC5. This report will be followed by several thematic reports and districts profile reports. The main indicators report covers several issues mainly population size and distribution, education, settlement, population projections to mention but a few. NISR hopes that the results in this report supplemented by the upcoming thematic reports would meet the demand of census data users across the board.

On this occasion, I would like to extend my sincere gratitude to the Government of Rwanda and development partners for availing financial, logistical and technical support. The NISR would like to appreciate all stakeholders who worked tirelessly with us to ensure that the 2022 Rwanda Population and Housing Census operation was successful.

Special recognition also goes to the Ministry of Finance and Economic Planning, Ministry of Defense, Ministry of Local Government, Ministry of Education, Ministry of Foreign Affairs, Ministry of ICT and Innovation, Ministry of Interior, Ministry of Health, Ministry in Charge of Emergency Management, the Rwanda National Police, Rwanda Correctional Services, Rwanda Biomedical Center (RBC), Rwanda Information Society Authority (RISA), Rwanda Utilities Regulatory Authority (RURA), Rwanda Public Procurement Authority (RPPA), Office of Government Spokesperson (OGS), and Rwanda Broadcasting Agency (RBA) for the direct involvement in awareness campaign, logistical and data collection operations.

I also wish to express my appreciation to the local government authorities and NISR staff for their excellent operational organization and to the tens of thousands of enumerators and supervisors for their painstaking efforts throughout the data collection phase.

Finally, the people of Rwanda, residents, and visitors, your cooperation was crucial towards the success of the census.

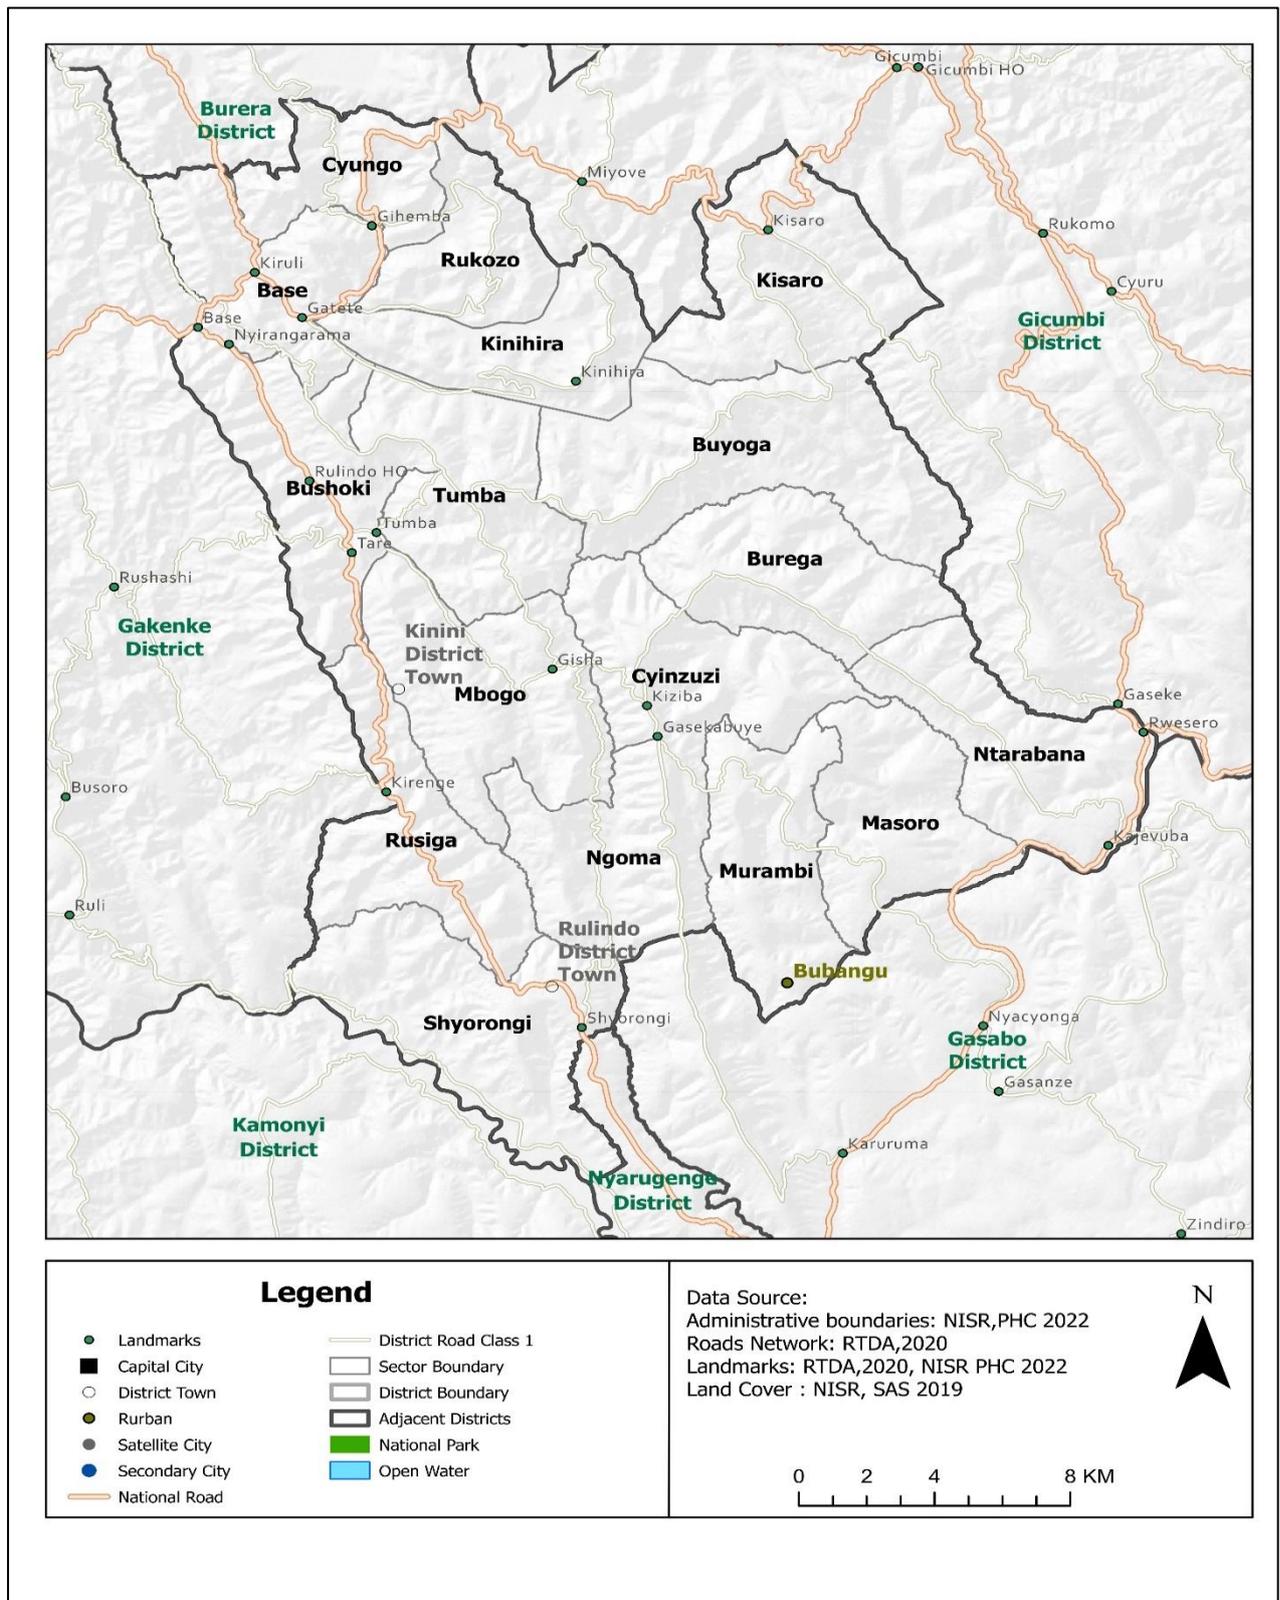

Thank you.

**MURANGWA Yusuf**  
Director General,  
National Institute of Statistics of Rwanda

**Error! Reference source not found.** shows that in Rulindo District 94.8% of children aged 6 to 11 years (the official primary school-going age) are currently attending school 4.1% have never attended school and only 1.1% have previously attended school (which means that 5.2 of children aged 6 to 11 are out of school).

By comparing the distribution of the primary school-age population (6-11 years) across sectors in Rulindo District, comparisons reveal the disparities in primary school attendance across different sectors within Rulindo District. Sectors like Masoro and Ntarabana exhibit lower rates of children currently attending school (90.1% and 91.2% respectively) and higher rates of children who have never attended (8.6%, against 7.3% respectively). On the other hand, sectors like Base, Bushoki, Rusiga, and Tumba demonstrate higher rates of children currently attending school (98.1% , 97.8% and 97.7%(Rusiga and Tumba)%, respectively) and lower rates of children who have never attended (1.3% (Base, Bushoki) against 1.8%(Rusiga)1.6%(Tumba).

### 2.3.2. Gross and Net Attendance Rate (%) in Primary School in Rulindo District

Gross and Net Attendance Ratios are used to measure the extent of coverage of an educational program. It gives a comparison of the children attending school with the total size of the school-age population. It can also be used for assessing how far a country has succeeded in bringing to school all those who are eligible to attend.

The results of 5<sup>th</sup> RPHC 2022 reveal that not all children attending primary school level are of the official age for that level (6-11 years). The gross attendance rate in Rwanda is 141.7%, in Northern Province Gross attendance rate (GAR) is 144.1% and 141.9% in Rulindo District. The Net Attendance Rate (NAR) in Primary school for Rulindo district (94.8%) is higher than the NAR of the Northern Province (92.9%) and NAR of national level (89.3%).

A Gross Attendance Rate (GAR) of 141.9% in Rulindo District for the population 6 to 11 years indicates a high percentage of those who attended primary schools aged below 6 years and or above 11 years. On the other hand, the NAR indicates that only 94.8% of the population 6 to 11 years were attending primary schools in Rulindo District by 2022 (Table 2.8). In 2022, students older or younger than the official primary school age range made up 33.2%  $[(GAR141.9 - NAR94.8) / GAR141.9]$  of the primary school population of Rulindo District.

With a NAR of 98.1%, the Base Sector has the greatest percentage of pupils that are attending primary school and are of primary school-age. In comparison to other sectors, the Masoro sector has the lowest NAR at 90.1%, indicating a lesser percentage of pupils who are attending primary school within the eligible age range. Most of sectors have gender parity indexes greater than 1.00, suggesting better access to education for female students compared to male students.

### 2.3.3 Gross and Net Attendance Rate (%) in Secondary School

The table 2. 9 provides information on the gross and net attendance rates in the secondary school level (12-17 years) in Rulindo District, disaggregated by sex and sector. The Northern Province and Rulindo District both have higher NARs than the national average (22.9% and 23.9%, respectively, versus 22.3%) when compared to the national average. Comparing males and females in Rulindo District in terms of Net Attendance Rates (NAR), the table 2. 9 indicates that a higher proportion of females (28.6%) are attending secondary school compared to males (19.1%).

Female students older or younger than the official secondary school age range made up 35.2%  $[(GAR44.1 - NAR28.6) / GAR44.1]$  of the female with secondary school age of Rulindo District, while for male students it made up 42.3%  $[(GAR33.1 - NAR19.1) / GAR33.1]$ . This shows that females have a higher attendance rate in Rulindo District compared to males when considering the overall attendance rates, regardless of age or grade-level eligibility. At the sector level, the highest net attendance rate is in Bushoki (32%) and the lowest is in Masoro, Cyinzuzi and Ntarabana (18.7% and 19.0% respectively).

<sup>3</sup> **Enrollment** is the act of enrolling or the state of being enrolled while **Attendance** is *(the state of attending)* the state of attending, presence.

### 2.3.4 Highest level of school attended in Rulindo district

The results of 5RPHC-2022 indicate the total population of Rwanda aged 3 and above is 11,999,691. The highest level of education attended is categorized into several levels: Never attended School, Nursery, Primary, INGOBOKA/Vocational, Lower secondary, Upper secondary, University, and Not stated. In Rwanda, 16.7% of the population aged 3 years and above has never attended school, while 2.7% have attended nursery, and 59.5% have attended primary school. Other education levels include 0.8% for INGOBOKA/Vocational, 9.6% for lower secondary, 7.1% for upper secondary, 3.6% for university, and 0.0% is not stated.

The total population of the Northern Province aged 3 and above is 1,847,684. The distribution of the highest level of education attended is like the national level, with slight variations. In the Northern Province, 16.0% of the population has never attended school, while 2.7% have attended nursery, and 61.9% have attended primary school. Other education levels include 0.7% for INGOBOKA/Vocational, 9.6% for lower secondary, 6.4% for upper secondary, 2.6% for university, and a small proportion 0.0% is not stated.

The total population of Rulindo District aged 3 and above is 323,243. In Rulindo District, 14.1% of the population has never attended school, while 2.5% have attended nursery, and 65.5% have attended primary school. Other education levels include 1.0% for INGOBOKA/Vocational, 9.1% for lower secondary, 5.7% for upper secondary, 2.2% for university, and a small proportion 0.0% is not stated. The distribution of the highest level of education attended varies

among sectors, with differences in the percentage of individuals at each education level. For example, Burega has a higher percentage (17.9%) of individuals who have never attended school compared to other sectors, while Shyorongi has a higher percentage (9.3%) of individuals who attended upper secondary school. Each sector has its own unique distribution of educational levels attended by the population. The table below indicates the findings:

## 2.4 Characteristics of the Employed Population

The official working age in Rwanda is 16 years and above. Aggregate employment generally increases with growing population. Therefore, the ratio of Employment to the working age population (employment to population ratio) is an important indicator of the capacity of the Economy to provide employment to a growing population. A decline in the employment-to population ratio is often regarded as an indicator of economic slowdown and a decline in total employment as an indicator of a more severe economic downturn.

<sup>4</sup> The Distribution (Count and %) of the resident population of Rulindo district age 3 and above by highest level of school attended by sector (male, female) is in the annex

### 2.4.1 Employment to population ratio by sex, Province, District and area of residence

The results presented in the below

Table 2. 11 shows that the employment to population ratio stood at 45.9% in Rwanda, it is lower among females (40.2 %) than males (52.4 %). On the other side, it was observed that the employment to population ratio is higher in urban areas of Rwanda (53.5%) than in rural areas (42.7%). It was observed that in the Northern Province, the employment to population ratio stood at 42.9%, it is higher in urban areas (50.3%) than in rural areas of the Northern Province (41.3%). It was also revealed that the employment to population ratio is 39.0% among people residing in Rulindo districts, it is higher in urban areas of Rulindo (51.6 %) than in rural areas of Rulindo (37.5%).

## CHAPTER 3: SUB-POPULATION

### 3.1 Children Population ( 0-17 years)

According to the UN Convention on the Rights of the Child (1989), a child is defined as every human being under 18 unless, under the law applicable to the child, majority is attained earlier. It is relevant to underline here that this definition by age coincides with that of Rwanda, as stipulated in Article 3 of the National Law n° 54/2011 of 14 December 2011 relating to the rights and the protection of the child, which stipulates that a child is any person under the age of 18. The age range (0–17) adopted for this report reflects this definition.

#### 3.1.1 The number and share of children Rulindo District

At the national level, the children population constitute 44.5% of the total population of 13,246,394 residents. The Northern Province has 888,804 children with a share of 43.6% of the total resident population. In Rulindo District, the children constitute 43.4% of the resident population of the district with a percentage of males slightly greater than the females' one (45.5% to 41.5%). At sector level, the children's share is high in Murambi (46.3%), Masoro (45.8%) and Ntarabana (45.6%) and is small in Kinyihira (40.5%) and Tumba (41.1%). The table below indicate distribution of children by sector and by sex.

## 3.2 Youth population in Rwanda

For statistical purposes, the United Nations defines "youth" as those persons between the ages of 15 and 24 years, without prejudice to other definitions by Member States. Considering the current priorities and trends of Rwanda's Development, the definition of Youth in terms of age has been revised in this policy. It was brought from 14 -35 years to 16–30 years.

### 3.2.1 The youth population in Rulindo district

The results of 5<sup>th</sup> RPHC-2022 revealed that the youth population represent 27.1% (3,595,670) of the total population (13,246,394). In Rulindo district, the youth population was 92,714 which represents 25.7% of the total resident population of the district (360,144). The sector with the highest youth share is Kisaro (28.6%) while Ngoma (23.3%) and Ntarabana(23.6%) have the lowest share of youth. The table below indicate distribution of youth by sector and by sex.

### 3.4 Elderly Population(60 years and above)

Rwanda has enacted laws such as the Law No 088/01 of 07/09/2020 (Office of the Official Gazette of Rwanda, 2020) on Presidential order ratifying the protocol to the African charter on human and peoples' rights on the rights of older persons in Africa adopted by the twenty sixth ordinary session of the Assembly, held in Addis Ababa, Ethiopia, on 31 January 2016 through an Official Gazette No.27 of 07/09/2020 and Law No.59/2008 of 10/09/2008 on prevention and punishment of gender- based violence (Office of the Official Gazette of Rwanda, 2008),

whose Article 32 sets the penalty for violence against an elderly person. It is over two decades since the United Nations convened the First World Assembly on Ageing (Vienna, 1982) (National Academy of Sciences, National Research Council, 2001)) that launched an international action programme, which was the first international instrument on ageing, to provide a foundation for the formulation of policies and programmes on ageing. This was done to guarantee economic and social security to older people and other opportunities to contribute to national development.

### 3.4.1 Elderly population of Rulindo district by Sector

In 2022, the elderly persons constitute 7.6% of the total resident population of Rulindo district. The share of the elderly females (8.5%) is higher than the male's one (6.6%), reflecting the higher life expectancy for women. ## CHAPTER 4: HOUSEHOLDS AND HOUSING CHARACTERISTICS

### 4.1 Household characteristics

In this chapter, the 5<sup>th</sup> Population and Housing Census 2022 investigated households and housing characteristics; those include household size, households' heads by sex, type of habitat, housing tenure, materials used for construction, sources of energy used for lighting and cooking, water sources, sanitation facilities, asset possessed by household and mode of waste and disposals.

#### 4.1.1 Number and mean size of the private households

The results of the 5th RPHC 2022 indicate the total of 3,312,743 private households in Rwanda. In the Northern Province, they are 506,064 and 359,575 in Rulindo District.

The average household size in Rulindo District is 3.9 persons per household. At the Sector level, the highest sizes are found in Cyungo, Murambi and Rukozo (4.0 persons/household each). The smallest household sizes are found in Burega(3.7persons/household).

The table below indicates number of households and size of household members per sector.

## 4.2 Housing Characteristics

### 4.2.1 Type of habitat

The results of the 5<sup>th</sup> Population and Housing Census 2022 revealed that in the Northern Province, the predominant type of habitat is Umudugudu (Planned rural settlement) housing (70.5%) and Dispersed/ Isolated housing (22.3%). The most common type of habitat in Rulindo district is Umudugudu (Planned rural settlement) (52.8%) followed by Dispersed/ Isolated housing (40.2%). The type of habitat varies across sectors Umudugudu (Planned rural settlement) housing is most prevalent in Cyungo (83.7%) and Rukozo (83.4%). The sectors with the high percentages of dispersed/isolated housing units are Ngoma (78.0%) and Masoro (70.9%). The table below displays results by sector.

## 4.2.3 Material of the housing units

### 4.2.3.1 Main materials of the roof

The results of the 5<sup>th</sup> RPHC 2022 indicate that housing units are mainly covered by iron sheets in Rwanda (74.1%) and in the Northern Province (79.3%). In Rulindo district, housing units are mainly covered by iron sheets (62.8%) followed by local tiles (37.1%). Only 0.1% are covered by industrial tiles, all other type of material of roof are lower than 0.1%. The variation by sector is not very significant. The high percentages of housing units covered by iron sheets are found in: Murambi (99.5%), Shyorongi (98.3%), and Masoro (97%). The lowest is in Tumba with 24.5% of housing units covered by iron sheets. The highest percentage of the housing units covered by local tiles is found in Tumba sector (75.4%).
