

REPUBLIC OF RWANDA

PRODUCER PRICE INDEX (PPI)

**Producer Price
Index
(PPI)**

May 2020

1. Summary

This is the monthly publication of the Producer Price Index (PPI) for the month of May 2020.

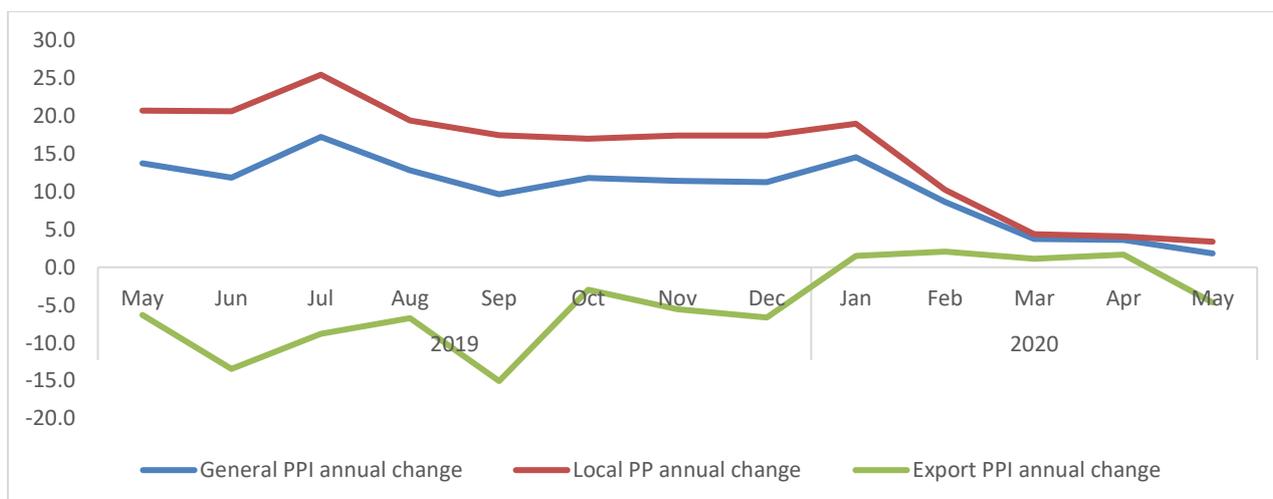

- General Producer Price Index increased by 1.8 percent on annual basis
- Local Producer Price Index increased by 3.4 percent on annual basis
- Export Producer Price Index decreased by 4.6 percent on annual basis
- General Producer Price Index decreased by 1.1 percent on monthly basis
- Local Producer Price Index is relatively stable on monthly basis
- Export Producer Price Index decreased by 5.6 percent on monthly basis

1. Introduction

The Producer Price Index (PPI) measures the average change over time in prices received by domestic producers for the production of their goods and services. The Producer Price Index for Rwanda is published on a monthly basis.

It presents price changes for all combined products, products for local sales and that for exports. It covers a sample of 114 establishments and 402 products spread countrywide, both in Kigali City and in rural areas.

The Producer Price Index survey is conducted jointly with the National Bank of Rwanda. It now covers mining, manufacturing and energy.

2. General Producer Price Index

Table 2 below presents the percentage changes on monthly and annual basis.

Level	Index ID	ISIC rev. 4 Description	Weights	Percentage change in May.2020	
				on Apr.2020	on May.2019
1	R	Rwanda	1000	-1.1	1.8
2	RB	Mining and quarrying	96	4.1	-8.4
2	RC	Manufacturing	714	-2.5	3.7
2	RD	Electricity, gas, steam and air conditioning supply	58	0.0	13.0
2	RE	Water supply; sewerage, waste management and remediation activities	129	0.0	0.0
2	RJ	Information and communication	3	0.0	0.0

Source:NISR

In May 2020, General PPI increased by 1.8 percent when compared to the same month of 2019. This is mainly due to an increase of 3.7 percent in prices of manufacturing activities, and the prices of Electricity which increased by 13 percent. Prices in mining & quarrying decreased by 8.4 percent.

The monthly general PPI decreased by 1.1 percent. This was mainly due to a decrease in prices of Manufacturing of 2.5 percent.

3. Local Producer Price Index

The table 3 below presents the percentage changes on monthly and annual basis.

Level	Index ID	ISIC rev. 4 Description	Weights	Percentage change in May.2020	
				on Apr.2020	on May.2019
1	R	Rwanda	1000	0.0	3.4
2	RC	Manufacturing	749	0.0	4.7
2	RD	Electricity, gas, steam and air conditioning supply	76	0.0	13.0
2	RE	Water supply; sewerage, waste management and remediation activities	171	0.0	0.0
2	RJ	Information and communication	4	0.0	0.0

Source:NISR

Local PPI increased by 3.4 percent in May 2020 compared to the same month of 2019. This was mainly due to an increase of 4.7 percent in prices of manufacturing and an increase of 13 percent in prices of Electricity.

Local PPI is relatively stable on a monthly basis.

4. Export Producer Price Index

The table 4 below presents the index and the percentage changes on monthly and annual basis.

Level	Index ID	ISIC rev. 4 Description	Weights	Percentage change in May.2020	
				on Apr.2020	on May.2019
1	R	Exports	1000	-5.6	-4.6
4	RB0729	Mining of other non-ferrous metal ores	393	4.1	-8.4
6	RC107980	Manufacture of coffee products	268	7.0	14.0
6	RC107990	Manufacture of tea products	328	-14.6	-7.2
4	RC2029	Manufacture of other chemical products n.e.c.	10	3.1	-1.4

Source:NISR

Export PPI decreased by 4.6 percent in May 2020 compared to the same month of 2019. This was due to a decrease of 8.4 percent in prices of mining of other non-ferrous metal, and a decrease of 7.2

percent in prices of tea products. Prices of coffee products increased by 14 percent.

The monthly export PPI decreased by 5.6 percent. This was mainly due to a decrease of 14.6 percent in prices of tea products. Prices of coffee products increased by 7 percent while prices of mining of other non-ferrous metal increased by 4.1 percent.

5. Technical note on PPI

The Producer Price Index (PPI) measures the average change over time in the prices received by domestic producers of goods and services which are output of production or enter in the production process.

NISR publishes PPI data for Mining, Manufacturing and Energy, and it will continue to be published monthly, about 4 weeks following the month under review.

The establishments are classified according to ISIC rev. 4; and the classification is determined by their main output.

The weights used in the PPI for Rwanda refer to the value of output (turnover without taxes) of establishments as reported in the 2011 Manpower survey collecting data for the year 2010, which constitutes the reference base period for the PPI calculation (January 2010). NISR plan to rebase the PPI using the weights as reported in establishment census 2017.

The point of pricing is the establishment. The price is the selling price received by the producer for the selected product as it leaves the factory gate. In general, prices are collected each month from the selected establishment by considering the mid-point of each month of the month under review.

The formula used in the PPI calculation is the geometric modified Laspeyres

Annex 1: Producer Price Index, General		Index (Dec 2010=100)			Percentage change in May.2020		Contributions ¹ :
